Partnership Mission

As collaborative partners in education, our two schools are committed to helping all students master the 21st century skills to become career & college ready.

Our schools:

- provide opportunities for continuous growth for professional educators, both vocational and academic, and joint preparation of future educators.*
- promote opportunities for all educators that help build both strong pedagogical practice and content knowledge.*
- integrate disciplines so that students can practice responding to varying real-world demands of audience, task, and purpose.*
- ensure that all educators use technology and digital media strategically and capably and explicitly teach technology tools within disciplines to all students.*
